

Milaeger's

milaegers.com

We would like to address concerns from our customers shopping regarding shopping at Milaeger's. We can assure you that the safety of our staff and our customers is of utmost concern to our family. We have taken every measure possible to provide a safe environment.

First of all, the guidelines for stores with selling space over 50,000 square feet call for 4 people per 1,000 square feet. All of our greenhouses are open to the public, and, technically, we could allow 912 customers at a time. We have nowhere near that amount of people. We have nowhere near the traffic of a grocery store.

You may have heard that our parking lot is full, but we don't have a large parking lot, and many of the cars belong to employees who are working offsite on our landscape and mowing crews. Our checkouts have huge plexiglass sheets that separate our cashiers from people checking out. Walmart's plexiglass is about 1/6 the size of ours. We have sanitizer available and distance markers on the floor. We have cart sanitation supplies available at the entrance where the carts are placed. All of our employees have masks, and they practice social distancing with each other and with our customers. The CDC guidelines do not mandate masks, though we do encourage their use.

Our curbside pickup is very convenient, and allows for the customer to remain in the car while the merchandise is loaded in the customer's truck. We have made it easy to order many items online.

We hope we have addressed your concerns and made it clear that we are continually taking steps to ensure the safety of everyone at Milaeger's.

Sincerely,

THE MILAEGER FAMILY
